

Assist America® Mobile App Now Available on Google Play and in the Apple App Store

The Assist America Mobile applications for Android and iPhone provide members with a one-touch connection to our Operations Center. Members can place an emergency phone call just by tapping a button, as well as view Assist Alerts, use our U.S. embassy locator (available for iPhone only) or view Pre-Trip Information. Non-members can learn more about the company as well as read service descriptions and find information for students.

The U.S. embassy locator, available for the iPhone, utilizes Google Maps to allow users to search for the U.S. embassy nearest to their location, anywhere in the world, using their mobile device's GPS.

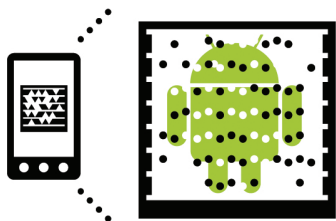

Assist America has also released a SecurAssist Mobile application that allows members to view Intelligence Updates, learn more about SecurAssist as well as contact us to inquire about services. It is available on Google Play and in the Apple App Store.

These innovations are part of Assist America's ongoing commitment to its customers to provide the highest level of quality and relevance for our services. Safe travels!
